TIPS AND BEST PRACTICES FOR SUCCESSFUL IMPLEMENTATION OF WORKFLOWS

Having a documented workflow can help you organize tasks used to support client-interaction so each event is repeated the same way and all clients and prospects receive a similar customer experience. This package provides a foundational understanding about the workflow so you can assess if the processes you are currently using can be more efficient and systematic.

While this document focuses on helping you manage the process of researching and selecting products for your clients, it also references services, tools, documents and templates found on Schwab Advisor Center™ website for advisors working with Schwab Advisor Services.

REGARDING CUSTOMIZATION

Preparation is the key to success. Because each firm is unique, take the time to analyze your current processes, compare them to the processes and resources in this package and plan any customizations before implementing these workflow steps. The purpose of this workflow package is to help you understand best practices upon which you can build.

INTEGRATION WITH OTHER WORKFLOWS

Some workflows in the Schwab OpenView Workflow Library have relationships to or dependences on other workflows. For this reason, we recommend you download and implement all of the other Process and Product Review workflows along with this Investment Product Strategy workflow to realize the fullest benefit.

GETTING ADDITIONAL HELP

Some of the steps in this process involve the use of a financial analysis and rebalancing software applications. The information in this document supports the workflow itself, not how to enter the workflow or financial data into any of your firm’s software or systems. For help entering this information into your firm’s software applications, contact the various software providers.
UNDERSTANDING THE INVESTMENT PRODUCT STRATEGY WORKFLOW

The first step to understanding a workflow is to understand where it resides in the overall business process. This section shows how the Investment Product Strategy workflow is organized, how it relates to other processes in the workflow series, and provides a view of the process in both graphical and checklist formats.

THE PROCESS & PRODUCT REVIEW WORKFLOW SERIES

A disciplined approach to strategic planning can help you manage the complexities of a growing business, make intelligent choices among a growing set of options, and keep your firm focused on executing the right strategies. Establishing goals and putting processes in place to achieve them can help your firm improve its service levels and overall effectiveness.

The Process & Product Review workflow processes will help you organize these and related tasks into easy-to-follow workflows that you can implement into your office, helping you create and deliver solutions and services to help meet your clients’ investment and planning needs.

The Process & Product Review process consists of three main workflow components:

- **Investment Product Strategy** – This process contains the activities and tasks you will need to establish and maintain your firm’s investment strategies, processes, and products.

- **Financial Planning Process** – This process contains the activities and tasks you will need to prepare, plan, and conduct effective reviews of investment accounts, strategies, and outlook with your clients.

- **Process Management** – This process contains the activities and tasks you will need to create and manage processes throughout your practice.

Important

This workflow package discusses only the Investment Product Strategy process. Packages for other workflows in this series are addressed in separate documents on SchwabIntelligentTechnologies.com:

- Financial Planning Process
- Process Management
INVESTMENT PRODUCT STRATEGY PROCESS OVERVIEW

PROCESS DIAGRAM

For some, seeing the workflow as a diagram makes the process easier to understand. The diagram, or process map, provides a visual outline of the tasks organized by role and allows you to see the entire process end-to-end with interdependencies. This diagram serves as a best practice recommendation only. Adjustments may be needed to suit the needs of your firm.

HIGH-LEVEL PROCESS CHECKLIST

The Investment Product Strategy process checklist displays the workflow tasks in a checklist format rather than a process map or diagram. The checklist helps you focus on gathering all the information required to complete the workflow effectively. This checklist serves as a best practice recommendation only. Adjustments may be needed to suit the needs of your firm.

<table>
<thead>
<tr>
<th>STEP</th>
<th>ROLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>□ Define the firm’s overall Investment Strategy</td>
<td>Senior Advisor</td>
</tr>
<tr>
<td>- Document the investment strategy if you have not already done so</td>
<td></td>
</tr>
<tr>
<td>- Develop and document monitoring criteria for assets and models</td>
<td></td>
</tr>
<tr>
<td>- Develop asset allocations and models based on investment strategy</td>
<td></td>
</tr>
<tr>
<td>□ Determine if you will be using a template for the Investment Policy Statement (IPS) you will give to clients</td>
<td>Associate Advisor</td>

</table>
INVESTMENT PRODUCT STRATEGY PROCESS OVERVIEW

☐ Send an update to the firm stakeholders to inform them of the progress on the goals and metrics
   Client Service Associate

☐ Monitor watch lists and field client exceptions and requests
   Associate Advisor

☐ Determine if updates need to be made to products or models
   • If yes, begin research step again
   • If no, continue with monitoring of the current products
   Senior Advisor
ADDITIONAL RESOURCES

The Schwab Advisor Center website offers research, analysis and product tools to help you determine what assets might fit best into the firm’s investment policies. The Trading and Research section contains a rich selection of resources, articles, and tools to help you research products. Click the Trading and Research link, and then Research tab to find helpful resources.

To find these resources, log in and navigate to the Trading and Resources section.

In this package, a few tools and templates are highlighted that you might find helpful for the workflow documented in this packet, including:

- **Schwab Advisor Center Research Tools** on page 11 – in this section, find tools to help you do research by markets, security type or managed.

- **Investment Proposal Center** on page 12 – in this section, use the tool to help you streamline your research and analysis process as a whole to create client-specific proposals.

For illustrative purposes only
SCHWAB ADVISOR CENTER RESEARCH TOOLS

In the section below, the supporting documentation referenced is located on the Schwab Advisor Center website.

The Research tab in Schwab Advisor Center provides tools you can add to other investment research tools you may already be using for product research:

- **The Markets** tab gives you information about current US markets as well as global markets. Use the Charts sub-tab to understand how the markets compare to one another or to spot trends and momentum. Use the Sectors and Industries sub-tabs to see analysis broken down into sectors and industries. Use the Market Reports link to access Schwab market reports quickly from any view.

- **The tabs for Stocks, Mutual Funds, ETFs and Fixed Income** give you targeted, specific information about each security type, including select lists, charts, ratings and news.

- **The Tools** tab contains helpful tools for managing your research, such as watch lists, alerts, screeners and comparison tools.

- **The Managed Accounts** tab contains tools and information for researching managed accounts including research for managers by style, strategy lists and performance reports.

For illustrative purposes only
INVESTMENT PROPOSAL CENTER

In the section below, the supporting documentation referenced is located on the Schwab Advisor Center website.

The Investment Proposal Center is a one-stop tool to help you create customized, specific investment proposals for your clients.

Use the tool throughout the process, from product research to creating an individualized Investment Proposal for your client.

Review the tutorials and demos and read the list of frequently asked questions to learn more.

The Investment Proposal Center ("IPC") is provided by Informa Investment Solutions, Inc. ("Informa"), an independent financial services firm and a wholly owned subsidiary of Informa Financial Information Inc. IPC is licensed from Informa by Charles Schwab & Co. Inc. ("Schwab"). Informa Investment Solutions Inc. is not affiliated with Schwab.
