SCHWAB REPORTS FOURTH QUARTER EARNINGS PER SHARE OF **\$.57 GAAP, \$.74 ADJUSTED**⁽¹⁾, BRINGING FULL-YEAR RESULTS TO **\$2.12 AND \$2.45, RESPECTIVELY**

Core Net New Assets Rise 33% to a Record \$281.9 Billion for the Year, Including \$61.7 Billion in December
Total Client Assets Reach a Record \$6.69 Trillion at Year-End, Up 66%

WESTLAKE, Texas, January 19, 2021 – The Charles Schwab Corporation announced today that its net income for the fourth quarter of 2020 was \$1.1 billion, compared with \$698 million for the third quarter of 2020, and \$852 million for the fourth quarter of 2019. Net income for the twelve months ended December 31, 2020 was \$3.3 billion, compared with \$3.7 billion for the year-earlier period. The company's financial results include TD Ameritrade from closing on October 6, 2020 forward, as well as certain acquisition and integration-related costs and the amortization of acquired intangibles. Together these transaction-related expenses totaled \$429 million and \$632 million on a pre-tax basis, for the fourth quarter and full-year 2020, respectively.

Beginning with the second quarter of 2020, the company's financial presentations include references to adjusted measures of expenses, net income, diluted earnings per common share, and pre-tax profit margin, as well as return on tangible common equity (ROTCE), which are intended to help investors evaluate Schwab's operating performance as well as facilitate a meaningful comparison of our current results to both historic and future periods.

CEO Walt Bettinger said, “Producing record operating performance and closing the largest brokerage acquisition in history during the fourth quarter of 2020 was an extraordinary capstone to an extraordinary year. Schwab’s unrelenting commitment to seeing through clients’ eyes helped us not only stand tall throughout the events of the past twelve months, but also enabled us to enter 2021 larger, stronger, and more capable of serving clients than ever.”

“The impact of COVID-19, along with social and political turmoil, created an unprecedented combination of personal and macroeconomic challenges for our clients, employees and stockholders alike,” Mr. Bettinger continued. “The pandemic’s rapid escalation in early 2020 was accompanied by volatile equity markets and further easing of monetary policy. As the year progressed, government aid packages and vaccine developments helped settle the markets, with the S&P 500® eventually erasing its pandemic-related losses to finish up 16% from December 2019. Against this backdrop, client engagement with the financial markets rose to record levels – pro-forma combined new-to-firm households increased more than 175% compared to 2019, with the number of households placing trades up more than 50% year-over-year. Our clients also continued to set numerous single-day trading records, including a peak of 7.8 million trades on November 9. As we collectively focused on helping clients navigate the trials of this environment, they rewarded us with a record \$281.9 billion in core net new assets – including a record \$119.4 billion in the fourth quarter – exceeding \$200 billion for the third consecutive year. At December 31, total client assets reached a record of \$6.69 trillion spread across 29.6 million brokerage accounts, up 66% and 140%, respectively, from a year ago.”

Mr. Bettinger added, “Throughout 2020, we persisted in executing our strategy, working tirelessly to reinforce our overall value proposition and share the benefits of increased scale with our clients. Notable solutions introduced during the year included Schwab Intelligent Income® and Schwab Plan™, each designed to assist with key investing and planning needs. In addition, we made several enhancements to our mobile app – which supported 2.6 million unique users during the year, up 54% from 2019 – such as the integration of Schwab Intelligent Portfolios® as well as the launch of Schwab Assistant, a chatbot that enables clients to intuitively perform tasks on-demand. Our ongoing investments in technology that improve both the client experience and our efficiency helped us to accommodate unprecedented levels of activity in 2020 – Schwab alone handled 2.3 billion total interactions across web, mobile, chat, and direct messaging. Access to guidance remains extremely important in this environment. Advised assets made up roughly half of our overall client assets at December 31, and assets enrolled in digital advisory ended the year at \$57.9 billion, up 18%. For our registered investment advisor clients, we’ve made strides in improving our service delivery by better aligning advisors with the teams and resources that support their particular needs. Additionally, we continued to expand our digital service capabilities to help advisors more seamlessly and efficiently support existing clients, cultivate new relationships, and scale their businesses. We also celebrated the 30th anniversary of Schwab IMPACT® with a virtual format that included advisors who custody client assets with TD Ameritrade for the first time. The conference brought together participants from around the country in an interactive forum, with a record 2,200 advisors in attendance. Our focus remains unchanged as we work to create a combined custodian positioned to deliver top-quality service and value to advisors of all sizes across a rapidly growing industry.

“In addition to TD Ameritrade, we also successfully closed three other acquisitions during the year, which each support our key strategic initiatives in unique ways. The USAA transaction added incremental scale as we welcomed over 1 million new accounts and \$80 billion in brokerage and wealth management client assets, as well as a long-term referral arrangement, which is well underway. The acquisition of Motif’s technology and hiring of their staff enables us to accelerate progress on personalized investing capabilities. Similarly, Wasmer Schroeder™ Strategies advances our efforts to develop proprietary solutions that benefit clients by allowing us to deliver a range of fixed income offerings designed specifically to meet our clients’ needs. And finally, TD Ameritrade not only builds scale, but also supports our ability to meet specific needs across client segments.”

Mr. Bettinger concluded, “As I reflect on 2020, I feel a deep sense of gratitude – to our clients, for entrusting us with record levels of new business, to our employees for their diligent commitment to serving others while balancing the health and safety of their own families, and to our stockholders, for focusing on the long-term, despite a volatile year and another round of accommodative interest rate policies instituted by the Federal Reserve. Pulling off our to-do list in an environment like the past twelve months takes a very special team, and I am more certain than ever that we have the talent, culture, and client-first strategy needed to successfully pursue the tremendous growth opportunities still ahead of us.”

CFO Peter Crawford commented, “Schwab’s 2020 financial results, which include TD Ameritrade from October 6 forward, demonstrate our ongoing success with clients and the benefits of our diversified revenue model in the face of environmental headwinds. During March, the Federal Reserve acted to support the economy by cutting the Fed Funds rate from

1.75% to near zero and announcing sizeable asset purchase programs. Mortgage refinancing activity subsequently accelerated and our net interest margin was impacted by both historically low rates and increased prepayments of mortgage-backed securities held in our investment portfolio. Strong growth in interest-earning assets via client asset inflows and allocation decisions, as well as our TD Ameritrade acquisition, helped limit the resulting year-over-year decline in net interest revenue to just 6% to \$6.1 billion. Growing balances in advisory solutions and a robust rebound in equity markets led to an 8% increase in asset management and administration fees to \$3.5 billion. Record client trading activity, and the addition of TD Ameritrade, led to an 88% increase in trading revenue to \$1.4 billion – even as we absorbed a full-year impact of the commission reductions we implemented late in 2019. With the TD Ameritrade acquisition, our fourth quarter results included bank deposit account (BDA) fee revenue for the first time, which totaled \$355 million for the period from close to year-end. BDA balances grew by 6% during that period and ended the year at \$165.9 billion. Overall, while both Schwab and TD Ameritrade were performing well independently, we believe our first reported results as a combined firm help support the case that we’re creating an even more resilient business, producing fourth quarter revenues that were up 60% relative to standalone Schwab on a year-over-year basis.”

“On the expense front, our 2020 spending was in-line with expectations given our acquisition activities, along with the need to support our clients and employees as they navigated uniquely challenging environmental stresses,” Mr. Crawford continued. “Total GAAP expenses increased 26% to \$7.4 billion for the year, which encompassed \$442 million in acquisition and integration-related costs and \$190 million in amortization of acquired intangibles. Exclusive of these items ⁽¹⁾, adjusted total expenses were up 16% year-over-year, with approximately 13% attributable to including our acquisitions for part of 2020. The challenges of the past twelve months notwithstanding, our flexibility as an organization enabled us to successfully harness efficiencies and leverage our scale in order to produce a still-solid 36.8% pre-tax profit margin (42.2% on an adjusted basis) and a 9% return on equity (15% ROTCE) for the year ⁽¹⁾.”

Mr. Crawford added, “Last year’s combination of stiff revenue headwinds and remarkable growth provides a clear example of why we remain focused on building a strong balance sheet capable of supporting our business in any environment. Our consolidated balance sheet grew 87% to end the year at \$549 billion, reflecting both our substantial organic growth and the absorption of TD Ameritrade’s margin book and other interest-earning assets. We ended the year with a preliminary consolidated Tier 1 Leverage Ratio of 6.3%, which reflects the impact of that acquisition as well as the issuance of an additional \$2.5 billion of preferred equity in early December.”

Mr. Crawford concluded, “2020 was an intensely challenging year in which we stayed true to our heritage. Together, our expanded team pushed through the business obstacles triggered by COVID-19 – uncertainty, volatility, and complexity – to effectively balance near-term profitability with driving strategic progress and helping solidify our competitive positioning. While we cannot predict what the future holds, we know that consistent growth is only made possible by managing for the long-term and serving our clients with clarity and focus – regardless of the circumstances.”

Note: The above table reflects the acquisition of TD Ameritrade, effective October 6, 2020.

⁽¹⁾ Amounts have been calculated based on amortized cost.

⁽²⁾ On January 1, 2020, the Company transferred all of its investment securities designated as held to maturity to the available for sale category, as described in Part I – Item 1 – Note 5 of our Quarterly Report on Form 10-Q for the quarter ended September 30, 2020.

⁽³⁾ Beginning in the fourth quarter of 2020, securities lending revenue has been reclassified from broker-related receivables and other revenue. Securities lending expense has been reclassified from other expense. Prior period amounts have been reclassified to reflect this change.

⁽⁴⁾ Beginning in the fourth quarter of 2020, broker-related receivables were removed from total interest earning assets and netted against non-interest-bearing funding sources, resulting in an immaterial reduction to total interest-earning assets and total funding sources. Prior period amounts have been reclassified to reflect this change.

⁽⁵⁾ Interest revenue or expense was less than \$500 thousand in the period or periods presented.

Non-GAAP Financial Measures

(In millions, except ratios and per share amounts)

(Unaudited)

In addition to disclosing financial results in accordance with generally accepted accounting principles in the U.S. (GAAP), Schwab's fourth quarter earnings release contains references to the non-GAAP financial measures described below. We believe these non-GAAP financial measures provide useful supplemental information about the financial performance of the Company, and facilitate meaningful comparison of Schwab's results in the current period to both historic and future results. These non-GAAP measures should not be considered a substitute for, or superior to, financial measures calculated in accordance with GAAP, and may not be comparable to non-GAAP financial measures presented by other companies.

Schwab's use of non-GAAP measures is reflective of certain adjustments made to GAAP financial measures as described below.

Non-GAAP Adjustment or Measure	Definition	Usefulness to Management and Investors
Acquisition and integration-related costs and amortization of acquired intangible assets	<p>Schwab adjusts certain GAAP financial measures to exclude the impact of acquisition and integration-related costs incurred as a result of the Company's business acquisitions, amortization of acquired intangible assets, and, where applicable, the income tax effect of these expenses.</p> <p>Adjustments made to exclude amortization of acquired intangible assets are reflective of all acquired intangible assets, which were recorded as part of purchase accounting. These acquired intangible assets contribute to the Company's revenue generation. Amortization of acquired intangible assets will continue in future periods over their remaining useful lives.</p>	<p>We exclude acquisition and integration-related costs and amortization of acquired intangible assets for the purpose of calculating certain non-GAAP measures because we believe doing so provides additional transparency of Schwab's ongoing operations, and may be useful in both evaluating the operating performance of the business and facilitating comparison of results with prior and future periods.</p> <p>Acquisition and integration-related costs fluctuate based on the timing of acquisitions and integration activities, thereby limiting comparability of results among periods, and are not representative of the costs of running the Company's on-going business. Amortization of acquired intangible assets is excluded because management does not believe it is indicative of the Company's underlying operating performance.</p>
Return on tangible common equity	Return on tangible common equity represents annualized adjusted net income available to common stockholders as a percentage of average tangible common equity. Tangible common equity represents common equity less goodwill, acquired intangible assets — net, and related deferred tax liabilities.	Acquisitions typically result in the recognition of significant amounts of goodwill and acquired intangible assets. We believe return on tangible common equity may be useful to investors as a supplemental measure to facilitate assessing capital efficiency and returns relative to the composition of Schwab's balance sheet.

The tables below present reconciliations of GAAP measures to non-GAAP measures and include the results of operations for TD Ameritrade beginning October 6, 2020.
