Methodology & Sample Information

Methodology and Respondent Demographics

Background:

Charles Schwab & Co has tracked client sentiment for over 10 years to gauge how clients (investors) are feeling about their current financial situation, market & investing opportunities or risks, the market outlook, and their confidence in investing and achieving financial goals.

Since Q4'21, Schwab has tracked client sentiment among **active traders** separately.

Methodology:

- The data is collected quarterly via an online survey amongst Schwab clients with Retail Assets of at least \$2,000
- Q3 study was fielded July 9th – July 19th, 2024

Sample:

- 1,040 active traders (clients who actively trade equities or trade options, futures, or forex).
 - Of the 1,040 Active Traders, 666 traders were transitioned from Ameritrade and 374 traders were legacy Schwab clients.
- The data was weighted by Life Stage and Investible Assets/Affluence to reflect the Trader segment.
- Counts noted below are prior to weighting to show the sample sizes used for subgroup analysis.

Rounding:

- In some cases, the individual elements of a chart may not sum to the total due to rounding.
